SINGLE BRASS BODY

## HONE, FOR THE MODERN HOME.

The Hone collection found its inspiration in straight line architecture and precise planes, which has come together beautifully in a design that speaks purely stylistic performance. The sharp angular shapes are enhanced only by softly radiused details, resulting in design lines that are built to compliment any modern minimal bathroom environment. That combined with expertly crafted Kohler technology means your stylish new mixer comes with the performance to match.

## HONE™

Timeless and deliberate, the Hone collection embodies the beautifully understated elements of minimalist design. By eliminating unnecessary details, the collection is designed to elicit an emotional response with its stark, refined beauty.
