THE LEADING EDGE IN **STYLE**

At KOHLER®, we are proud leaders in bathroom design, due to our sleek Mica Vessels.

These elegant vessels emphasise KOHLER's refined sense of innovation and embodies true minimalism, becoming a quintessential centrepiece of modern and contemporary style.

THE LEADING EDGE IN **DURABILITY**

Our Mica Vessels are created with ultra-durable Supramic® material, which affords the product a longer life than ordinary ceramic would. The vessels are then finished off with a patented DFI coating that keeps the products stain-resistant, making cleaning supremely effortless.

AND THE THINNEST EDGE IN DESIGN

Mica's elegantly edged vessels are only 6mm thick. These sleek designs demonstrate true innovation in bathroom product development.

The beautifully slender edges will accentuate your bathroom's design language, making Mica's Vessels an exquisite addition to your bathroom.

MICA ROUND VESSEL
